## Sewage Treatment Products Diffusers

Application : Sewage Treatment, Sludge Stabilisation  
and the Aeration of Stagnant Water

Technical Information	250mm	500mm
Material		
Membrane with precision aeration pores	High specification EPDM Silicone	One piece injection moulded PVCu
Stainless steel retaining clamps		
Connection 3/4 Pipe thread female		
Airflow	1.8-6.0cfm	3.0-9.0cfm
Temperature range for operation	0-+120 degrees	0-+120 degrees
Weight	.45kg	.9kg
Size of bubble through diffusion	1-3mm	1-3mm

Our membrane air diffuser is a fine pore flexible membrane diffusers that provide operational flexibility with maximum oxygen transfer efficiency. Alternate materials of constructions are available for special applications. Our diffuser units are available with premium quality EPDM membranes. Multiple perforation patterns are available to optimize system performance.
