

MARSH Sewage Treatment Products

Back Flow Prevention Valves

110mm & 160mm DIN Standard EN13564

Flood Prevention For Sewage Treatment Plants

Suitable For Uni:Sewage Plants 6-50PE & Uni:Gem2 6-50PE

NEW

The valve can be installed at the same time as the Uni:Sewage Treatment Plant or Uni:Gem Plants. The valve prevents and protects against backflow from a stream or watercourse that may be in a flood condition.

The valve operates fully automatically without any external mains supply. The valve is also provided with overhaul closure lever, by moving the lever the valve is closed in both directions.
